

The Magic of a Million

ACTIVITY BOOK

Great Hands-on Activities and Reproducibles to Explore a Million and Other Big Numbers

counting • measuring • finding averages • problem-solving

using geometry • estimating • spatial relationships • collecting

How can we keep track of one million stars?

Will we sneeze one million times in our lives?

How long would it take to paint a picture with one million dots?

Could we eat one million ice cream cones in our lives?

How many books would one million words fill?

Written by **David M. Schwartz**, author of *How Much Is a Million?*, and Math Educator, **David J. Whitin**
